

Success Criteria

Purpose

This document defines the measurable criteria used to evaluate the successful completion of the Green Valley Medical Center Digital Transformation Project. These criteria align business objectives with project outcomes and provide a basis for project acceptance.

Project Success Criteria

Category	Success Criteria	Measurement
Project Delivery	Project completed within the approved timeline	Completed within six months
Budget	Project delivered within the approved budget	No significant budget overruns
System Availability	Cloud solution successfully deployed	System available to all authorized users
Data Migration	Existing patient data migrated successfully	≥ 99% migration accuracy
User Adoption	Staff actively using the new system	≥ 90% adoption within the first month
Training	Staff successfully trained	100% of users complete training
Appointment Management	Digital scheduling fully operational	Manual scheduling eliminated

Patient Records	Electronic Health Records implemented	All new patient records created digitally
Reporting	Management reports available	Standard reports generated successfully
Security	Security requirements implemented	Role-based access and audit logging enabled
Compliance	Regulatory requirements satisfied	GDPR compliance confirmed
User Satisfaction	Positive user feedback after implementation	≥ 80% user satisfaction

Key Performance Indicators (KPIs)

KPI	Target
System Uptime	≥ 99.5%
Patient Registration Time	30% reduction
Appointment Scheduling Time	40% reduction
Administrative Workload	25% reduction
Patient Record Retrieval Time	< 10 seconds
Billing Processing Time	30% faster
User Satisfaction Score	≥ 80%
Staff Training Completion	100%

Acceptance Criteria

The project will be considered successful when:

- The solution is deployed and operational.
- All agreed project deliverables are completed.
- Business objectives have been achieved.

- Key stakeholders formally approve the implementation.
 - End users have completed training.
 - Data migration is successfully completed.
 - The system operates without critical defects during production launch.
 - Project documentation has been completed and approved.
-

Success Review

Project success will be evaluated during the post-implementation review based on the achievement of the defined KPIs, stakeholder feedback, and operational performance after deployment.
