

Project Charter

1. Project Overview

The Green Valley Medical Center is undertaking a digital transformation initiative to implement an integrated cloud-based Practice Management and Electronic Health Record (EHR) system.

The project aims to replace fragmented spreadsheet-based processes with a centralized platform that supports patient management, appointment scheduling, billing, and clinical documentation across all departments.

By providing secure and accessible information, the new solution will improve operational efficiency, strengthen data governance, and provide reliable information that supports better business decision-making.

2. Business Objective

- Improve operational efficiency by replacing manual spreadsheet-based processes.
 - Centralize patient, appointment, billing, and clinical data.
 - Enhance data accuracy and security.
 - Improve collaboration between departments.
 - Support better business reporting and decision-making.
-

3. Project Scope

The project scope is defined in the Project Scope document and covers the digital transformation of the clinic's core clinical and administrative processes.

4. Out of Scope

Out-of-scope activities are defined in the Project Scope document and include areas such as physical medical equipment, clinical treatment decisions, patient-facing mobile application

development, and procurement activities.

5. Key Deliverables

- Business Case
- Project Charter
- Stakeholder Register
- Requirements Documentation
- Process Maps
- Solution Design
- Database Design
- Testing Documentation
- Training Materials
- Deployment

6. Stakeholders

Role	Responsibility
Clinic Director	Project Sponsor
Business Analyst	Requirements & Analysis
Project Manager	Project Coordination
Medical Staff	End Users
Administrative Staff	End Users
IT Vendor	Solution Provider

7. High-Level Timeline

Phase
Project Initiation
Business Analysis
Solution Design

Development & Configuration
Testing
Deployment & Closure

8. Assumptions

Refer to the Assumptions & Constraints document.

9. Constraints

Refer to the Assumptions & Constraints document.

10. Risks

Refer to the Risk Register.

11. Success Criteria

Refer to the Success Criteria document.
