

Stakeholder Interviews

- i** The purpose of these interviews is to gather insights from key stakeholders involved in the clinic's daily operations. The findings will be used to identify business needs, define project requirements, and support the design of future business processes.
- The interviews documented in this portfolio are simulated stakeholder interviews based on the fictional Green Valley Medical Center scenario. They were created to demonstrate a Business Analysis elicitation approach and do not represent interviews conducted with a real organization.

Interview Summary

Stakeholder	Role	Department	Interview Objective
Sarah Murphy	Clinic Director	Management	Understand strategic objectives and operational priorities.
Emma Collins	Reception Manager	Administration	Understand patient registration and appointment scheduling processes.

Dr. James O'Connor	General Practitioner	General Medicine	Understand clinical workflows and patient record management.
Michael Byrne	Finance Manager	Finance	Review billing and payment processes.
Olivia Walsh	Laboratory Coordinator	Laboratory	Understand laboratory request and result management.

Interview Findings

Clinic Director

Current Challenges	Business Needs
Limited visibility of operational performance.	Centralized reporting and business dashboards.
Reports are manually consolidated.	Automated reporting.
Difficult to monitor KPIs.	Real-time performance monitoring.

Reception Manager

Current Challenges	Business Needs
Appointment scheduling is manual.	Centralized scheduling system.
Provider availability is difficult to manage.	Real-time provider availability.
Patient information is entered multiple times.	Single patient registration process.

General Practitioner

Current Challenges	Business Needs
Patient information is spread across multiple spreadsheets.	Centralized Electronic Health Record (EHR).
Laboratory results are received manually.	Integrated laboratory results.
Clinical history is difficult to access.	Complete patient history in one system.

Finance Manager

Current Challenges	Business Needs
Billing is disconnected from appointments.	Integrated billing process.
Payment reconciliation is manual.	Automated payment tracking.
Financial reporting requires manual work.	Financial dashboards and reporting.

Laboratory Coordinator

Current Challenges	Business Needs
Laboratory requests are manually recorded.	Digital laboratory requests.
Results are shared by email.	Automatic result availability.
No integration with patient records.	Integrated laboratory module.

Key Themes Identified

Theme	Priority
Manual processes	High

Lack of system integration	High
Duplicate data entry	High
Centralized patient records	High
Automated reporting	Medium
Real-time operational visibility	Medium
Improved communication between departments	Medium

Key Takeaways

The stakeholder interviews revealed a common need for greater system integration, reduced manual work, and improved access to operational information. Across all departments, stakeholders emphasized the importance of centralized patient records, automated workflows, and real-time reporting to improve efficiency and support better decision-making.

Next Steps

The interview findings will be used as inputs for the following deliverables:

- Requirements Elicitation
 - Gap Analysis
 - Future State Analysis (To-Be)
 - Business Requirements Document (BRD)
 - Functional Requirements
 - User Stories
-
