

Risk Register

i This document identifies, assesses, and tracks potential risks that may impact the successful delivery of the Green Valley Medical Center Digital Transformation Project. It supports proactive risk management by defining mitigation strategies and assigning ownership.

Risk Register

ID	Risk	Impact	Probability	Mitigation Strategy	Owner	Status
R1	Stakeholders unavailable for workshops	High	Medium	Schedule meetings in advance and obtain management support	Project Manager	Open
R2	Delay in data migration	High	Medium	Validate and cleanse data before migration	Technical Lead	Open
R3	User resistance to the new system	High	Medium	Provide communication, training, and change management activities	Business Analyst	Open

R4	Budget overruns	High	Low	Monitor project costs and control scope changes	Project Manager	Open
R5	Project timeline delays	High	Medium	Track milestones and address blockers promptly	Project Manager	Open
R6	Technical issues during implementation	Medium	Medium	Perform comprehensive system testing before deployment	Technical Lead	Open
R7	Data loss during migration	High	Low	Perform full backups and migration testing	Technical Lead	Open
R8	GDPR compliance issues	High	Low	Review security and compliance requirements throughout the project	Compliance Officer	Open
R9	Insufficient user training	Medium	Medium	Develop a structured training plan and provide	Training Coordinator	Open

				user support		
R10	Scope creep due to additional requirements	High	Medium	Apply formal change control process and obtain stakeholder approval	Business Analyst	Open

Risk Assessment Matrix

Probability	Impact	Risk Level
High	High	Critical
High	Medium	High
Medium	High	High
Medium	Medium	Moderate
Low	High	Moderate
Low	Medium	Low
Low	Low	Low

Risk Monitoring Process

Project risks will be reviewed regularly throughout the project lifecycle. New risks will be documented as they are identified, and existing risks will be reassessed during project status meetings. Mitigation actions will be tracked until the risk is closed or no longer applicable.

Risk Status Definitions

Status	Description
--------	-------------

Open	Risk has been identified and is being monitored.
Mitigating	Mitigation activities are currently in progress.
Closed	Risk is no longer applicable or has been successfully addressed.
